EQC 96

Analogue Meters Contact type Moving - Iron Movement

© Zimmer Instruments Order No. EQC_90_Deg.Datasheet-EL.R0-920806-43-2013-EN

Application

These meters offer several advantages in switchboards and Transformers Panels. Front window glass and bezel can be easily replaced.

Movement

Moving iron movement has pivots of very high hardness. Movement is suspended between spring loaded sapphire jewels. Movement is critically damped by use of silicon coil

Safety Precautions

- 1) Instruments with damaged bezels or window glasses must be disconnected from the mains.
- 2) Adequate safety clearance must be maintained to control panel fasteners and to sheet metal housing. If non - insulated connector wires are used.
- 3) The back cover must be snapped into place after connector wired have been clamped for protection against accidental contact.
- 4) Scales may only be replaced under voltage - free conditions.
- 5) Bezels and window glasses may only be replaced under voltage - free Conditions.
